

PATRICIA MARIE BALDELOMAR

FULL STACK DEVELOPER

(+63) 927-6946968 | allaboutdev.pmob@gmail.com | <https://pmob-portfolio.vercel.app>

Full Stack Developer with over 4 years of experience delivering impactful, end-to-end digital solutions. Skilled in combining creativity and technical expertise to solve complex problems and build intuitive, high-performance web and mobile applications. Proven track record in project management, user-centric development, and effective collaboration across cross-functional teams.

PROFESSIONAL EXPERIENCE

Full Stack Developer Freelancer

- **Quality Assurance Testing:** Ensure system quality through rigorous manual and automated testing. Validate functionality against client requirements, report bugs, and work closely with developers to troubleshoot and resolve issues efficiently.
- **Graphic Design:** Create wireframes and mockups aligned with brand identity. Support UI consistency and enhance user experience by translating visual concepts into responsive front-end components.
- **Full Stack Development:** Build responsive web applications using React.js, Node.js, TailwindCSS, HTML, CSS, and JavaScript, Wordpress, etc. Integrate client-side interfaces with server-side logic, manage MySQL databases, and use Azure DevOps for version control, task tracking, and deployment automation.

Intern (System Analyst / Web Developer) Commission On Audit

- **System Analysis and Documentation:** Assist in gathering and analyzing requirements for the OJT Management System. Support the design of system architecture, workflows, and database schemas.
- **Development and Implementation:** Assist in implementing system features, including user interfaces, data management modules, and reporting tools.
- **Full Stack Development:** Design and develop responsive user interfaces for the OJT Management System using HTML, CSS, and JavaScript, ensuring seamless integration with server-side functionality. Collaborate closely with back-end developers to implement and maintain full-stack features. Utilize MySQL for efficient data management and Azure DevOps for version control, task tracking, and streamlined deployment workflows.
